IMASD ENERGÍAS S.L.

## 1 COMPANY MISSION

Our way and culture of doing business is strongly linked to the importance of customer relationships and their consolidation over time, so much so that we have agreed on our mission as follows: "To establish and maintain relationships with our customers, collaborating with Integration Solutions where we make their activities more efficient".

Our business model establishes that through the creation and maintenance of relationships with customers we can understand their needs and problems that, together with a process of integration, engineering and experience, we can convert products into a service that adds value, leaving our customers satisfied, configuring a virtuous circle.

## 2 COMPANY VISION

IMASD ENERGÍAS S.L. is the result of the sum of the entrepreneurial spirit of its founders who decided to join forces in 2008 to form a professional group that has been growing and developing since then with a vocation to provide its services in the field of energy saving and optimization, applied to engineering projects, consultancy and services to public entities, private companies and investment groups.

Since the date of its creation, IMASD ENERGÍAS S.L. has evolved by focusing on the delivery and execution of projects of greater added value, always oriented to the needs and requirements of its clients and according to the specific characteristics of their businesses. The experience developed during its existence and the knowledge of current technologies is our support when offering system integration services and products, with projects ranging from the basic study of a need to the complete implementation of the energy solution.

Its philosophy is to pursue efficiency and energy savings in the broad spectrum of renewable energies that IMASD ENERGÍAS S.L. audits, advises, implements and carries out maintenance and energy management (Monitoring and Tele-management).

They offer the best energy saving and efficiency solutions aimed at obtaining energetic, economic and environmental benefits.

OVERCOMING

EXCELLENCE

The Integrated Policy of IMASD ENERGÍAS S.L. considers as fundamental factors for the proper functioning of the Organization: professionalism, staff responsibility, health and safety of workers, communication, energy efficiency and respect for the environment in all its activities in the field of energy saving and optimization, applying to engineering projects, consulting and services to public entities, private companies and research groups.

As a development of this Integrated Policy and as part of the commitment acquired with the continuous improvement, in IMASD ENERGÍAS S.L. we have decided to adapt our Integrated Management System according to the UNE-EN-ISO 9001:2015, UNE-EN-ISO 14001:2015 and UNE-EN-ISO 50001:2011 standards.

The Management is personally committed to lead compliance with the Integrated System implemented in IMASD ENERGÍAS S.L. To this end, it declares the following Integrated Policy and undertakes to disseminate it and make it understood to all staff, and as applicable to its suppliers, customers and other interested parties, reviewing it and keeping it appropriate on an ongoing basis.

### 3 OUR QUALITY, ENVIRONMENT, ENERGY EFFICIENCY, HEALTH AND SAFETY POLICY IS BASED ON THE FOLLOWING PRINCIPLES:

- The full satisfaction of our customers, fulfillment of expectations of our stakeholders, respect for the environment and the efficient use of energy are our first priorities.
- To reach a high level of competitiveness in our markets based on the trust and loyalty of our customers and suppliers.
- To invest in the achievement of quality, environmental and energy efficiency objectives and goals within the permanent framework of continuous improvement of the system's effectiveness, ensuring the availability of the necessary resources.
- To facilitate the level of training necessary for the efficient performance of the functions and tasks of our workers.
- Commitment to provide safe and healthy working conditions for the prevention of work-related injury and ill-health appropriate to the purpose, size and context of the organization.
- Commitment to eliminate hazards and reduce risks to the safety and health of workers.
- Commitment to consultation and participation of workers and, where they exist, workers' representatives.
- Commitment to comply with applicable legal requirements and other requirements to which the organization subscribes, related to quality, environmental aspects, health and safety, energy use and consumption and energetic efficiency.
- Commitment to protect the environment and our surroundings, through actions and measures aimed at preventing any type of pollution that could be caused by operations due to our activity.
- Minimize our waste generation and provide training and means for our employees to raise their environmental awareness.
- Support the procurement of energy efficient products and services and design for improved energy performance.

It is the responsibility and commitment of the Management and the entire company to comply with the aforementioned requirements, based on the UNE-EN-ISO 9001:2015, UNE-EN-ISO 14001:2015, UNE-EN-ISO 45001:2018 and UNE-EN-ISO 50001:2015 standards.
